Any comments for us?

7 responses

the message drafting box doesn't let me send blank messages

I like the colour palette because it seems super healthy

I really like the design of the send box because it's very simple and to the point!

I like the font used because I see similar fonts quite often on websites which I'm used to. But I don't like the colour palette that much because it doesn't have a lot of varieties

Love the simplicity of the design

I don't like how they 3 green colours are different types of green like yellow green and cool green don't look nicely together and seem disjointed.

imo the design was user friendly, aesthetic and minimal. the chat box could have more padding so that it looks better
